

Accurately Estimating Vaccine Quantity

As vaccination clinics in long term care continue, it is very important providers accurately estimate the number of people to be vaccinated to avoid any wastage. If you are participating in the pharmacy partnership program, your matched pharmacy (CVS/Walgreens/LTC pharmacy) will call you a few days before the clinic to confirm the number of people to be vaccinated. Follow AHCA/NCAL's recommendations to provide an accurate estimate.

Take the Stress Out of Coding in 2021

The [ICD-10-CM 2021](#) manual by PMIC includes the most current version of the ICD-10-CM code set. In addition to official coding guidelines, this manual provides descriptions, indexes, tables, thumb indexing, and other special features to help you code more easily and faster. Other key components include a comprehensive introduction to ICD-10-CM, an Alphabetical Index to the Tabular List, chapter-specific guidelines preceding each chapter, and definitions of medical terms at the code level.
